# How Debt Repayment Strategy Affects Motivation 

 Journal of Consumer Research, 2016Keri L. Kettle, University of Manitoba Remi Trudel, Boston University Simon J. Blanchard, Georgetown University Gerald Häubl, University of Alberta

Which debt should you repay first?

|  | $A$ | $B$ |
| :---: | :---: | :---: |
| Owing | $\$ 4500$ | $\$ 500$ |
| Rate | $12 \%$ | $24 \%$ |

Which debt should you repay first?

|  | $A$ | $B$ |
| :---: | :---: | :---: |
| Owing | $\$ 4500$ | $\$ 500$ |
| Rate | $18 \%$ | $18 \%$ |

## Which debt should you repay first?

|  | $A$ | $B$ |
| :---: | :---: | :---: |
| Owing | $\$ 4500$ | $\$ 500$ |
| Rate | $19 \%$ | $17 \%$ |

## Debt Repayment as a Goal

| Debt A | Debt B | Debt C | Debt D | Debt E |
| :---: | :---: | :---: | :---: | :---: |
| $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

## Overarching Goal: Repay $\$ \mathbf{5 0 0 0}$

Subgoal: Repay ONE Debt (\$1000)

## How Subgoals Work

## SUBGOAL

## Dispersed Strategy

| Debt A | Debt B | Debt $\mathbf{C}$ | Debt D | Debt E |
| :---: | :---: | :---: | :---: | :---: |
| $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

repay $\$ 500$

| $\$ 100$ | $\$ 100$ | $\$ 100$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Debt A | Debt B | Debt C | Debt D | Debt E |
| $\$ 900$ | $\$ 900$ | $\$ 900$ | $\$ 900$ | $\$ 900$ |

## Concentrated Strategy

| Debt A | Debt B | Debt $\mathbf{C}$ | Debt D | Debt E |
| :---: | :---: | :---: | :---: | :---: |
| $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

## repay \$500

\$500

| Debt A | Debt B | Debt C | Debt D | Debt E |
| :---: | :---: | :---: | :---: | :---: |
| $\$ 500$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

## Credit Card Data

- HelloWallet.com
- Personal Finances Application
- Client enrolls:
- Provides access to online banking / accounts
- Measure Repayment Strategy in the real world
- Does (Concentrated) strategy in month $t$ predict greater debt repayment in month $\boldsymbol{t}+1$ ?

## Measure of Strategy: conc $_{\text {it }}$

$$
\operatorname{conc}_{i t}=\frac{\left(\sum_{k \in \dot{A}_{i t}} \frac{\left(x_{i k t}-\dot{x}_{i t}\right)^{2}}{n_{\dot{A}_{i t}}-1}\right)}{\dot{x}_{i t} \times \sum_{k \in \dot{A}_{i t}} x_{i k t}}
$$

- In English:
- Normalized (between 0 and 1)
- Variance of Payments divided by Average Payment

## Examples of conc $_{\text {it }}$

|  | A | B | Variance | Mean | Sum | Conc $_{\text {it }}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

## How Concentrated are Debts? ( concacc $_{\text {it }}$ )

## What Strategy do People Use?

Dispersed
Concentrated

## What Affects Debt Repayment ( $\boldsymbol{t}+\mathbf{1}$ )?

| Variable | Z-stat | Sig |
| :--- | :--- | :--- |
| conc $_{\text {it }}$ | 3.75 | $* * *$ |
| Prior repayment $^{l \mid}$ | 3.78 | $* *$ |
| accconc | it | -0.57 |
| Total Debt | 4.99 | $* * *$ |
| Monthly Spending | -4.64 | $* * *$ |
| Number of cards | -1.53 | $*$ |
| Closed an account | 0.37 |  |

$$
\text { * } p<.05,{ }^{* *} p<.01,{ }^{* * *} p<.001
$$

Use of a more Concentrated Strategy led to greater debt repayment in subsequent period.

## What Explains This Effect?

## FEELINGS OF PROGRESS

## "How much progress do you feel you made towards repaying your debt?"

|  | A | B |
| :---: | :---: | :---: |
| Start | $\$ 4500$ | $\$ 500$ |
| Payment | $\$ 300$ | $\$ 0$ |
| Current | $\$ 4200$ | $\$ 500$ |

3.46 / 7

|  | A | B |
| :---: | :---: | :---: |
| Start | $\$ 4500$ | $\$ 500$ |
| Payment | $\$ 0$ | $\$ 300$ |
| Current | $\$ 4500$ | $\$ 200$ |

4.33 / 7

## Greatest Rate vs Smallest Balance

## Scenario 5

|  | A | B |
| :---: | :---: | :---: |
| Start | $\$ 4650$ | $\$ 350$ |
| Payment | $\$ 300$ | $\$ 0$ |
| Current | $\$ 4350$ | $\$ 350$ |

3.33 / 7

Scenario 8

|  | A | B |
| :---: | :---: | :---: |
| Start | $\$ 4350$ | $\$ 650$ |
| Payment | $\$ 0$ | $\$ 300$ |
| Current | $\$ 4350$ | $\$ 350$ |

$$
4.62 / 7
$$

## Which debt should you repay first?

|  | A | B |
| :---: | :---: | :---: |
| Owing | $\$ 4500$ | $\$ 500$ |
| Rate | $19 \%$ | $17 \%$ |

## "How big is the role of motivation in debt repayment?"

## Thank-You!

Keri L. Kettle, University of Manitoba Remi Trudel, Boston University Simon J. Blanchard, Georgetown University Gerald Häubl, University of Alberta

## Why Does This Work?

1. Perceived Goal Progress (Pre-Subgoal Completion)

Kettle et al., Journal of Consumer Research, 2016
2. Success! (Post-Subgoal Completion)

Gal \& McShane, Journal of Marketing Research, 2012
3. Both Pre-Subgoal \& Post-Subgoal

Brown \& Lahey, Journal of Marketing Research, 2015
4. Debt Account Aversion

Scott Rick \& Friends, Journal of Marketing Research, 2011

## Greatest Rate of Movement

concentrated

|  | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Start | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |
| Payment | $\$ 1000$ | $\$ 0$ | $\$ 0$ | $\$ 0$ | $\$ 0$ |
| Current | $\$ 200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |

|  | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Start | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |
| Payment | $\$ 200$ | $\$ 200$ | $\$ 200$ | $\$ 200$ | $\$ 200$ |
| Current | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

dispersed
Rates of movement: $83 \%$ vs $17 \%$

## Greatest Amount of Movement

concentrated

|  | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Start | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |
| Payment | $\$ 1000$ | $\$ 0$ | $\$ 0$ | $\$ 0$ | $\$ 0$ |
| Current | $\$ 200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |

|  | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Start | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |
| Payment | $\$ 200$ | $\$ 200$ | $\$ 200$ | $\$ 200$ | $\$ 200$ |
| Current | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

dispersed

## Greatest Amount of Movement

We infer just as much progress whether he paid $\$ 1000$ into an account with $\$ 1200$ to start with, or $\$ 20000$ to start with.

## Smallest Amount Remaining

concentrated

|  | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Start | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |
| Payment | $\$ 1000$ | $\$ 0$ | $\$ 0$ | $\$ 0$ | $\$ 0$ |
| Current | $\$ 200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |

|  | A | B | C | D | E |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Start | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ | $\$ 1200$ |
| Payment | $\$ 200$ | $\$ 200$ | $\$ 200$ | $\$ 200$ | $\$ 200$ |
| Current | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ | $\$ 1000$ |

dispersed

## Experiment 2

- $2 \times 2 \times 2$ Between-Subject
- Repayment Strategy
- Concentrated vs. Dispersed
- Focus of Concentrated Strategy
- Smaller account vs. Larger account
- Amount Remaining in Each Account
- Equal vs. Unequal
- Note:
- Total starting debt and total payments are always the same.

## Experiment 2: Scenario

- "Imagine that you are in debt, and that your goal is to repay all of your debts in 12 months."
- 2 credit cards
- "Imagine that you have repaid the following amount in the past month."
- Key DV:
- Choice: Deposit Check into Credit Card?
- Mediators:
- Perceived progress?
- How close to attaining goal?
- Motivation to repay debt?
